One of the most important things you can do to prepare for a disaster is to have a plan and a way to communicate with your family. But beyond that, there are a number of practical skills that can help you survive and thrive in any situation.

In this article, we'll share 33 easy DIY outdoor hacks that can help you stay safe and comfortable in any disaster or survival situation.

1. Make a fire starter

Fire is essential for warmth, cooking, and signaling for help. But starting a fire can be difficult, especially in wet or windy conditions.

Here's a simple way to make a fire starter:

1. Gather some dry tinder, such as leaves, twigs, or paper.
2. Dip the tinder in melted wax or petroleum jelly.
3. Allow the tinder to cool and harden.

To use the fire starter, simply light one end and place it under your tinder bundle. The wax or petroleum jelly will help the tinder catch fire quickly and easily.

2. Purify water

Clean water is essential for survival. But in a disaster, the water supply may be contaminated or unavailable.

There are a number of ways to purify water, including boiling, filtering, and chemical treatment. Here's a simple way to purify water using a filter:

1. Gather some clean cloth or paper towels.
2. Fold the cloth or paper towels into a cone shape.
3. Place the cone in a clean container.
4. Pour the contaminated water into the cone.
5. The clean water will drip out of the bottom of the cone.

3. Build a shelter

Shelter is essential for protection from the elements and for privacy.

There are a number of different ways to build a shelter, depending on the materials available and the environment.

Here's a simple way to build a lean-to shelter:

1. Find a sturdy tree or other object to support the shelter.
2. Lean a long stick or pole against the support.
3. Cover the stick or pole with a tarp or other waterproof material.
4. Secure the shelter by tying the tarp or material to the ground.

4. Find food

Food is essential for survival. But in a disaster, food may be scarce or unavailable.

There are a number of ways to find food in the wild, including foraging, hunting, and fishing.

Here's a simple way to forage for edible plants:

1. Learn to identify edible plants in your area.
2. Look for plants with familiar characteristics, such as berries, nuts, or greens.
3. Only eat plants that you are certain are edible.

5. Make a signal fire

If you need to signal for help, a fire is the best way to do it.

Here's a simple way to make a signal fire:

1. Build a large fire in a clear area.
2. Place three logs in a triangle shape, with the points facing up.
3. Light the logs on fire.
4. The smoke from the fire will rise in a column, which can be seen from miles away.

6. Make a compass

A compass is essential for navigation. But if you don't have a compass, you can make your own using a needle and a magnet.

Here's a simple way to make a compass:

1. Magnetize a needle by rubbing it on a magnet.
2. Push the needle through a piece of cork or styrofoam.
3. Place the cork or styrofoam in a bowl of water.
4. The needle will align itself with the Earth's magnetic field, pointing north.

7. Make a map

A map is essential for navigating in unfamiliar territory.

If you don't have a map, you can make your own using a pencil and paper.

Here's a simple way to make a map:

1. Draw a circle on the paper to represent your current location.
2. Draw a line from the circle to represent the direction you are traveling.
3. Continue drawing lines to represent the different landmarks you pass along the way.
4. Label the landmarks with their names.

8. Make a first-aid kit

A first-aid kit is essential for treating injuries.

Here's a simple way to make a first-aid kit:

1. Gather essential medical supplies, such as bandages, gauze, antiseptic, and pain relievers.
2. Place the supplies in a waterproof container.
3. Label the container with a first-aid symbol or the words "First-Aid Kit".

9. Make a survival whistle

A survival whistle is essential for signaling for help.

Here's a simple way to make a survival whistle:

1. Cut a piece of wood or metal into a V-shape.
2. Sharpen the edges of the V-shape.
3. Blow into the V-shape to create a loud whistle.

10. Make a paracord bracelet

A paracord bracelet is a versatile tool that can be used for a variety of purposes, such as tying down gear, making a shelter, or creating a fishing line.

Here's a simple way to make a paracord bracelet:

1. Cut a length of paracord to the desired length.
2. Fold the paracord in half and tie a knot at the end.
3. Continue tying knots along the paracord, leaving a small loop at the end.
4. Attach the loop to your wrist or gear.

11. Make a fire pit

A fire pit is essential for cooking, warmth, and signaling for help.

Here's a simple way to make a fire pit:

1. Dig a hole in the ground that is about 2 feet wide and 1 foot deep.
2. Line the hole with rocks or bricks.
3. Build a fire in the pit.

12. Make a solar oven

A solar oven is a great way to cook food using the sun's energy.

Here's a simple way to make a solar oven:

1. Collect a large cardboard box.
2. Cut a hole in the top of the box, about the size of a small plate.
3. Line the box with aluminum foil.
4. Place a black pot or pan inside the box.
5. Cover the box with
