In his book *The Latin We Need: How Latin Saved Modern Civilization and Why It's Worth Learning Today*, Norm Schriever makes a passionate case for the study of Latin. He argues that Latin is not a dead language, but a living language that has played a vital role in the development of Western civilization. Schriever shows how Latin has shaped our languages, our laws, our governments, and our culture.

Schriever begins by tracing the history of Latin from its origins in ancient Rome to its use as the lingua franca of the Middle Ages and the Renaissance. He shows how Latin was the language of scholarship, diplomacy, and the law for centuries. Even after the rise of vernacular languages, Latin continued to be used in many fields, including medicine, science, and philosophy.

Schriever argues that the study of Latin is essential for understanding the history of Western civilization. He shows how Latin texts have influenced

our literature, our art, and our music. He also argues that the study of Latin can help us to better understand our own language and culture.

In addition to its historical and cultural value, Schriever argues that the study of Latin has many practical benefits. He shows how the study of Latin can improve our reading comprehension, our writing skills, and our critical thinking skills. He also argues that the study of Latin can help us to learn other languages more easily.

Schriever's book is a well-written and persuasive argument for the study of Latin. He provides a wealth of evidence to support his claims, and he writes in a clear and engaging style. I highly recommend this book to anyone who is interested in the history of language, education, and culture.
