Item Weight	: 7 ounces
Dimensions	: 8.5 x 0.17 x 8.5 inches

Getting Started

Before you start training your African Grey parrot, it is important to establish a strong bond with them. This means spending time with them each day, talking to them, and playing with them. Once you have a strong bond with

your parrot, they will be more likely to listen to you and cooperate with your training.

It is also important to find a training method that works for you and your parrot. There are many different training methods available, so you may need to experiment to find one that you both enjoy. Some popular training methods include:

- **Positive reinforcement:** This method involves rewarding your parrot with treats or praise when they do something you want them to do.
- **Clicker training:** This method involves using a clicker to mark the exact moment that your parrot does something you want them to do. The clicker sound is then paired with a treat or praise.
- **Target training:** This method involves teaching your parrot to touch a target with their beak. Once they have mastered this, you can use the target to guide them into different positions or behaviors.

Basic Obedience

Once you have established a training method, you can start teaching your parrot some basic obedience commands. These commands include:

- Come
- Stay
- Sit
- Down
- Up

- Off
- No

Teaching your parrot these commands will help you to control their behavior and keep them safe. For example, you can use the "come" command to call your parrot to you, the "stay" command to keep them from wandering off, and the "no" command to stop them from doing something they shouldn't.

Advanced Tricks

Once your parrot has mastered basic obedience, you can start teaching them some more advanced tricks. These tricks can include:

- Talking
- Singing
- Dancing
- Playing games
- Solving puzzles

Teaching your parrot these tricks will help to keep them entertained and stimulated. It will also strengthen your bond with your parrot and give you a sense of accomplishment.

Behavior Problems

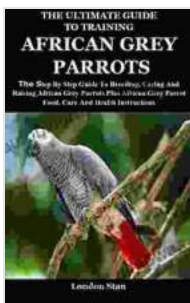

All parrots are individuals, and some may develop behavior problems. These problems can include:

- Biting
- Screaming
- Feather plucking
- Aggression
- Self-mutilation

If your parrot develops a behavior problem, it is important to seek professional help from a veterinarian or avian behaviorist. These professionals can help you to identify the cause of the problem and develop a treatment plan.

Training an African Grey parrot can be a rewarding experience for both you and your bird. By following the tips in this guide, you can teach your parrot a variety of commands and tricks. You can also help them to overcome behavior problems and live a happy, healthy life.

If you are interested in learning more about African Grey parrots, there are many resources available online and in libraries. You can also find African Grey parrot clubs and organizations in many parts of the world.
